TO

THE CIVIL ENGINEER,

AND

THE BRITISH AND IRISH PUBLIC.

London:

ARCHITECTURAL LIBRARY, 59, HIGH HOLBORN.

MDCCCLXIII.

ILLUSTRATIONS.

Pont du Val-Benoît, Liège *Frontispiece.*

PRELIMINARY OBSERVATIONS.

Sketch of the proposed Hastings and Rye Railroad, to join the South-Eastern line	<i>page</i> xiv ✓
Sketch of Mr. Stephenson's proposed French lines, in com- munication with the South-Eastern	<i>ib.</i> ✓
American locomotive engine, now employed on the Utica and Syracuse Railroad for luggage trains, at a speed of from 15 to 20 miles per hour	xx ✓
Reduced view of an American excavating machine (<i>in p.</i> xxiii.)	

UTICA AND SYRACUSE RAILROAD.

I. Isometrical projections of timber bridges on the Utica and Syracuse Railroad—spans of 40 and 30 feet	9
II. Do.—span of 60 feet	13
III. Elevation, plan, section, &c.—span of 88 feet	15
III ^a . Do.—span of 88 feet	<i>ib.</i>
IV. Do.—span of 84 feet	19
IV ^a . Isometrical projection—span of 82 feet	<i>ib.</i>
V. Do. of an abutment for a bridge of 82 feet span over the Oneida Creek	23
VI. Do. of a trestle bridge over the Oneida Creek Valley—60 spans of 29 feet each	25
VII. Elevation of span of 100 feet	30
VII ^a . Geometrical section and plan, and isometrical projection of truss, &c.	<i>ib.</i>

ILLUSTRATIONS.

	PAGE
VIII. Isometrical projection of a trestle bridge over the Onondaga Creek and Valley—20 spans of 30 feet each	36
IX. Details of the carpentry and joinery of American timber bridges	42
Perspective view of a pile-driving steam engine	46
X. Isometrical projection of superstructure for pile road	48
XI. Do. of iron plate, showing the manner of joining with an end plate beneath the joints—isometrical projections of single and double knees—cross section of superstructure for pile and graded roads—details of superstructure, &c. <i>ib.</i>	<i>ib.</i>
XI ^a . Isometrical projection of superstructure for graded road	<i>ib.</i>
XII. Crossing plates for railroad	57
XII ^a . Do.	<i>ib.</i>
XIII. Branch plates for railroad	58
XIII ^a . Culvert for do.	<i>ib.</i>
XIV. Viaduct constructed under the Erie Canal, at Lodi	63

RAILWAYS OF BELGIUM.

XXV. Sections of the Belgian Railway	40
XXVI. Section of the Vesdre Railway	54

TOGETHER MAKING TWENTY-EIGHT ENGRAVINGS.

THE
RAILWAYS OF BELGIUM
IN 1842.

TRANSLATED AND COMPILED FROM OFFICIAL DOCUMENTS

BY

EDWARD DOBSON, Assoc. I.C.E.

CONTENTS.

	PAGE
INTRODUCTION	ix
CHAPTER I.	
CONSTRUCTION.	
SECT. I.— <i>General description of the Belgian railways.</i>	
General direction, length, gradients, curves, gauge, rails, ballasting, plantations, drainage, barriers, distance standards, arrangement of the stations, &c.	1
SECT. II.— <i>Detailed account of the works of the Belgian railways.</i>	
Sections opened for traffic up to the 1st of January, 1842	7
NORTHERN LINE.	
Section from Brussels to Mechlin	<i>ib.</i>
„ Mechlin to Antwerp	10
EASTERN LINE.	
Section from Mechlin to Louvain	12
„ Louvain to Tirlemont	13
„ Tirlemont to Waremme	14
„ Waremme to Ans	16
„ Landen to St. Trond	17
Louvain branch—from the station to the canal basins	<i>ib.</i>
WESTERN LINE.	
Section from Mechlin to Termonde	18
„ Termonde to Ghent	20
„ Ghent to Bruges	21
„ Bruges to Ostend	22
„ Ghent to Deynze	23
„ Deynze to Courtray	24

	SOUTHERN LINE.	PAGE
Section from Brussels to Tubise		25
„ Tubise to Soignies		26
„ Soignies to Mons		28

SECT. III.—*Sections in construction on the 1st of January, 1842.*

	EASTERN LINE.	
The Liége inclines		29
The Val-Benoît bridge		37
Valley of the Vesdre (from Liége to the frontier of Prussia)		41
Summary description of the works of the section from Liége to Pepinster (1st, 2nd, and 3rd lots)		51
First subdivision of the first lot (section from the Meuse to Chênée)		<i>ib.</i>
Second subdivision of the first lot, and second and third lots (section from Chênée to Pepinster)		52
Summary of the works of the second section (from Pepinster to the Prussian frontier, 4th, 5th, and 6th lots)		55

	WESTERN LINE.	
Line from Courtray to the frontier of France		56
Line from Mouscron to Tournay		60
Note on the execution of the works of the western line :		
Section from Courtray to Mouscron		63
„ Mouscron to the frontier of France		66
„ Mouscron to Templeuve		<i>ib.</i>
„ Templeuve to Tournay		67

	SOUTHERN LINE.	
Section from Mons to Quiévrain		69
Line from Namur to Charleroy		75
Line from Charleroy to Braine-le-Comte		77

CHAPTER II.

CARRYING DEPARTMENT.

1. <i>Carriages.</i>	Passenger carriages, description of, number, &c.	79
	Table of the cost of the material of transport up to the 1st of May, 1842	80
2. <i>Locomotives.</i>	Number, description of	81
	Speed, power of engines, how limited by the gradients	82
	Number of miles run by locomotives	83
	Consumption and cost of coke	84
3. <i>Fares, Trains, Passengers, &c.</i>	Fares	<i>ib.</i>
	Table of the number of passengers conveyed on the Belgian railways from 1835 to 1841, inclusive	85
	Receipts from passenger traffic	<i>ib.</i>
4. Goods traffic, carriage of goods, when commenced, rates of charges		87

CHAPTER III.

COST, REVENUE, AND EXPENDITURE.

1. <i>Cost of first establishment.</i>	Amount of capital expended from 1st May, 1834, to 31st December, 1842	88
	Table showing the total cost of the first establishment of the Belgian railways from the 1st of May, 1834, to the 31st of December, 1841	<i>to face page</i> 89
	Original estimates	<i>ib.</i>
	Table showing the estimated and actual cost of the first lines of the Belgian railways constructed under the law of the 1st of May, 1834	<i>to face page</i> 92
	Table showing the difference between the estimates of 1840 and 1842	93
	Average cost of the railways per mile	94
2. <i>Capital engaged in the construction of the railways.</i>	Capital, how raised	95
	Amount of effective capital raised up to 1st of January, 1842	96
	Amount of additional capital required	<i>ib.</i>

CONTENTS.

	PAGE
Amount of traffic required to pay 5 per cent. interest on the capital	97
3. <i>Revenue and expenditure.</i>	
Table showing annual receipts of every kind from 1835 to 1841, both inclusive; and also the working expenses during the same period	98
4. <i>Profits.</i> Result of the working of the railways for the year 1841	100
Probable net revenue for the year 1842	<i>ib.</i>
Consideration of the increase of traffic to be derived from the completion of the sections now in construction	101
