

# THE FIRST PRINCIPLES OF RAILWAY SIGNALLING

INCLUDING AN ACCOUNT OF THE  
LEGISLATION IN THE UNITED  
KINGDOM AFFECTING THE WORKING  
OF RAILWAYS AND THE PROVISION  
OF SIGNALLING AND SAFETY  
APPLIANCES

BY

C. B. BYLES,

SIGNAL ENGINEER, LANCASHIRE AND YORKSHIRE RAILWAY  
SPECIAL LECTURER IN RAILWAY ECONOMICS IN THE  
UNIVERSITY OF MANCHESTER

LONDON  
THE RAILWAY GAZETTE  
QUEEN ANNE'S CHAMBERS, WESTMINSTER

—  
1910

# CONTENTS.

## CHAPTER I.

### INTRODUCTION AND HISTORICAL RETROSPECT.

	PAGE
The signalling system as a factor in the railway transportation problem ....	1
Why a signalling system may be necessary on a railway ....	2
The functions of signalling ....	3
Early railway working methods ....	4

## CHAPTER II.

### THE GROWTH OF THE SIGNALLING SYSTEM.

The development of traffic working conditions ....	7
Station signals ....	7
Auxiliary signals ....	7
Time interval ....	10
Space interval ...	11
The development of appliances ....	14
Isolated signals ....	14
Concentration ....	18
Concentration and interlocking ....	18

## CHAPTER III.

### THE THEORY OF THE SIGNALLING SYSTEM.

The contingencies provided for ....	20
The protection of obstruction....	21
The indication of direction ....	22
Definition of terms ....	22
The section post the unit of the signalling system ....	23
The means by which the space interval is provided for ....	23
The block telegraph system ....	24
The location of the signal box ....	26
The means by which the space interval is maintained ....	27

## CHAPTER VI.

## THE WORKING OF SINGLE LINES.

	PAGE
Introduction	59
The crossing-order system	60
The three authorised systems	61
The ordinary train staff system	61 ✓
The train staff and ticket system	62
The electric train staff and tablet systems	64
Signalling on single lines	65
The locking of intermediate siding connections	67
Gradients on single lines	69

## CHAPTER VII.

## GOVERNMENT CONTROL—LEGISLATION 1839–1878.

Introduction	71
Early legislation as to railway working	72
Railway Level Crossings Act, 1839	72
Railway Regulation Acts, 1840 and 1842	73
Railways Clauses Acts, 1845 and 1863	73
Railway Regulation Act, 1868...	74
"    "    1871....	74
"    "    1873....	75
Railway Returns (Continuous Brakes) Act, 1878	75
Early legislation as to the equipment of new railways	75
Inspection by the Board of Trade	75
Board of Trade requirements	76

## CHAPTER VIII.

## GOVERNMENT CONTROL—LATER LEGISLATION.

Railway Regulation Act, 1889....	79
"    "    1893....	81
Light Railways Act, 1896	81
Railway Employment (Prevention of Accidents) Act, 1900	82
Summary of powers of the Board of Trade	82

## CHAPTER IX.

## APPARATUS.

The semaphore	85
Facing point equipment	88
The interlocking frame	91
Fouling bars	93

## CHAPTER X.

THE PROBLEM OF THE DISTANT SIGNAL.		PAGE
The development of distant signal practice....	....	96
The need for a distinctive distant signal	....	97
Distant signals in short sections	....	98
The controlling of distant signals in short sections	....	100
The use of distant signals for other than block working purposes	....	102
Fog signalling	....	103
Apparatus to take the place of fog-men	....	105
Apparatus for placing detonators on the rail	..	105
The use of cab signals	....	106

## CHAPTER XI.

## POWER AND AUTOMATIC SIGNALLING.

Definitions	....	108
Power signalling	....	109
Automatic signalling	....	112
The track-circuit system	....	112
Semi-automatic signals	..	116

## CHAPTER XII.

## THE ELIMINATION OF THE HUMAN ELEMENT.

The causes of railway accidents	....	120
Signalling operations dependent for security upon the human agent	....	123
Methods by which the human element as a factor of safety may be eliminated	....	124
Conclusion	....	126

## APPENDIX I.

Synopsis of legislation affecting the working of railways and the provision of signalling and safety appliances, 1839-1901	....	127
--	------	-----

## APPENDIX II.

Railway Clearing House standard block signalling codes	....	136
--	------	-----

## INDEX.

# LIST OF ILLUSTRATIONS AND DIAGRAMS.

---

	PAGE
Signalling at a Junction .... ..	<i>Frontispiece</i>
Signal on Liverpool & Manchester Railway, 1834 .... ..	8
Signal on London & South-Western Railway, 1840 .... ..	12
Disc and cross-bar signal, Great Western Railway, 1838-1892 .... ..	16
Signalling at a roadside station .... ..	31
Signalling at an ordinary double junction .... ..	35
Early junction signalling arrangements .... ..	37
Three-position block instrument .... ..	43
Diagrams illustrating the method of block signalling .... ..	47
Apparatus used in connection with single line working .... ..	63
Signalling at a crossing station on a single line .... ..	66
Main-line semaphore .... ..	87
Facing point equipment .... ..	90
Locking frame and connections in signal box .... ..	92
Tappet locking .... ..	93
Signalling arrangements in short sections .... ..	99
Track circuit arrangement .... ..	113
Arrangement of a semi-automatic section post .... ..	117
