

Impacts of non-Aeronautical Development at Airports on Public Transport

Schriftenreihe 175

Institut für Verkehrsplanung
und Transportsysteme

Institute for Transport Planning
and Systems

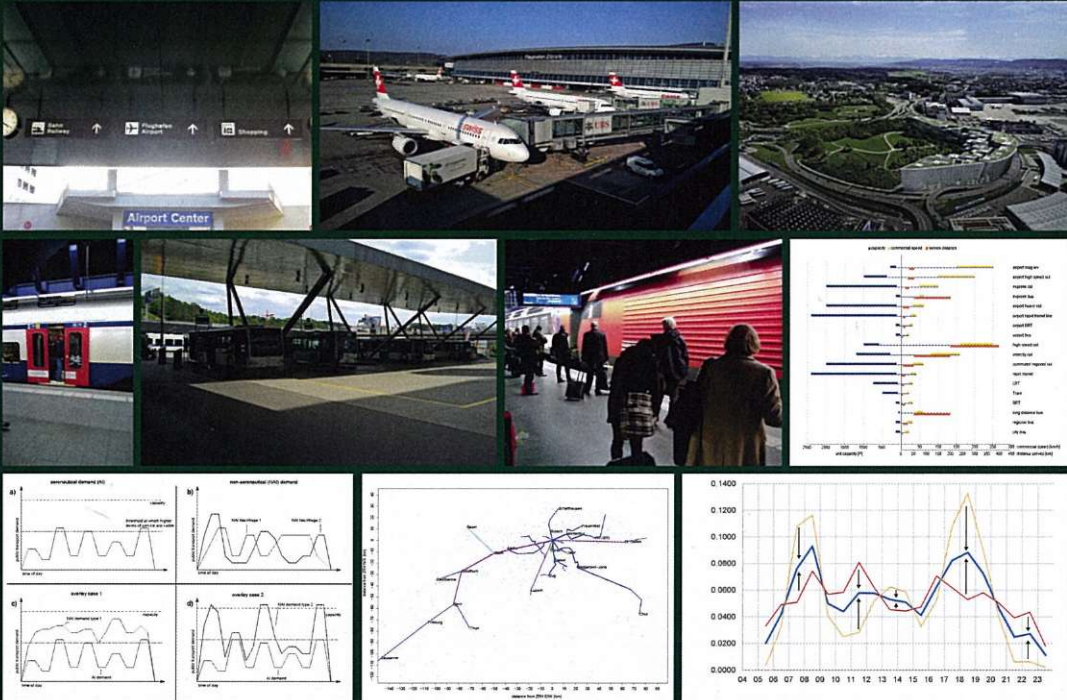

Table of Contents

Introduction	2
1.1 Background and Motivation	2
1.2 Research Question	3
1.3 Structure of Research	5
1.4 Report Outline	8
2 Airport Ground Access, Airport Cities and Public Transport	9
2.1 Airport Public Transport Access	9
2.1.1 Introduction	9
2.1.2 Characteristics of Airport Access Trips	12
2.1.3 Airport Ground Access Modes and Services	14
2.1.4 Influence Factors on Public Transport Use at Airports	19
2.1.5 Obstacles to Public Transport Use at Airports	21
2.1.6 Future Developments	22
2.2 Airport Cities	24
2.2.1 Introduction	24
2.2.2 Drivers and Developments	26
2.2.3 Situation and Outlook	27
2.3 Public Transport Planning	28
2.3.1 Introduction	28
2.3.2 Demand Distribution and Variation Issues in Public Transport	28
2.3.3 Technologies	29
2.3.4 Service Types	31
2.3.5 The Transport Network Design Problem	33
2.3.6 Mode Alternatives and Network Design	34
2.4 Traveller Behaviour	34
2.5 Synthesis	37
2.5.1 Situation	37
2.5.2 Opportunities and Relevance	37
2.5.3 Open Questions	38

3	Preliminary Case Study	39
3.1	Introduction	39
3.2	Data and Information used	39
3.3	Case Study Overview	39
3.3.1	Overview.....	39
3.3.2	Air Transport.....	41
3.3.3	Non-Aeronautical Activities	41
3.3.4	Ground Transport	41
3.4	Analysis Steps	44
3.4.1	AI and NAI Travel Demand Volumes	44
3.4.2	Annual Ridership Distribution and Effect of Air Travel	46
3.4.3	Daily Demand Distribution and Peaking Behaviour	47
3.4.4	Capacity and Potential Crowding	50
3.5	Findings	52
4	Concepts and Detailed Research Questions.....	54
4.1	Introduction	54
4.2	Concepts.....	54
4.2.1	Public Transport Service and Demand Interactions	54
4.2.2	Impacts on Public Transport Patronage.....	56
4.3	Detailed Research Questions.....	58
5	Modeling Approach.....	60
5.1	Requirements	60
5.2	Influences and Interactions.....	61
5.2.1	Demand Sub-Groups and Characteristics	61
5.2.2	Public Transport Services	62
5.2.3	Service Quality and Mode Choice Interaction	63
5.3	Simplifications and Assumptions	63
5.4	Method.....	66
5.4.1	Basic Structure	67
5.4.2	Inputs.....	68
5.4.3	Method.....	71

5.4.4	Outputs	75
5.4.5	Model Behaviour.....	76
6	Case Studies	82
6.1	Introduction	82
6.1.1	Requirements	82
6.1.2	Selected Case Study Overview.....	83
6.2	Zurich.....	86
6.2.1	Analysis steps.....	86
6.2.2	Traveller composition and mode choice.....	87
6.2.3	Spatial trip distribution	90
6.2.4	Study scenarios	90
6.2.5	Scenario Inputs.....	91
6.2.6	2012 AI NAI scenario	100
6.2.7	2012 AI only scenario.....	104
6.2.8	2030 AI NAI scenario	108
6.2.9	2030 AI only scenario.....	111
6.2.10	Summary	115
6.2.11	Conclusions	118
6.3	Dusseldorf.....	119
6.3.1	Analysis steps.....	119
6.3.2	Overview.....	119
6.3.3	Traveller composition and mode choice.....	123
6.3.4	Spatial trip distribution	125
6.3.5	Study scenarios	127
6.3.6	Scenario Inputs.....	127
6.3.7	2014 AI NAI scenario	137
6.3.8	2014 AI only scenario.....	141
6.3.9	2027 AI NAI scenario	145
6.3.10	2027 AI only scenario.....	148
6.3.11	Summary	152
6.3.12	Conclusions	155
6.4	Case Studies Summary.....	155

7	Findings	158
7.1	Effects on the total public transport system and ridership.....	158
7.1.1	Potential service expansions.....	158
7.1.2	Public transport mode share increases.....	158
7.2	Effects on public transport utilisation.....	159
7.2.1	Ridership distribution.....	159
7.2.2	Public transport service utilisation.....	160
8	Summary and Conclusions	161
8.1	Summary.....	161
8.2	Key results.....	163
8.3	Planning implications and concluding remarks.....	164
8.4	Perspectives for further research.....	166
	Abbreviations	168
	Appendices	170
A 1	Overview of Zurich Passenger and Airport Data	170
A 2	List of trip origins for Zurich scenarios	172
A 3	Overview of statistical forecasts for the Zurich case	176
A 4	Zurich case mode choice models	177
A 5	Zurich case barriers	179
A 6	Overview of Dusseldorf Passenger and Airport Data	180
A 7	List of trip origins for Dusseldorf scenarios	181
A 8	Passenger arrival/departure, DUS	185
A 9	Dusseldorf case mode choice models	187
	References	188

List of tables

Table 1	Overview of airports and public transport mode share, 1997/98/99	11
Table 2	Public transport modes considered by study and study context.....	16
Table 3	Public transport service types for airport access	17
Table 4	Common public transport technologies	31
Table 5	Functional classification of public transport services	32
Table 6	Overview of studies involving mode choice for airport trips	36
Table 7	Public transport mode shares at Zurich Airport.....	43
Table 8	Annual air passengers and public transport boardings	45
Table 9	Public transport boardings by source, 2009 and 2012.....	45
Table 10	Linear regression results for public transport to air passenger distributions	47
Table 11	AI/NAI travel distribution variation	50
Table 12	Summary of input and control variables	71
Table 13	Model mode share results for different conditions and input values.....	80
Table 14	Selected Case Studies Overview (2014 data)	83
Table 15	Modes of transport and group assignment of Zurich studies	87
Table 16	Summary of demand volumes for 2012 and 2030 scenarios	94
Table 17	ZRH case public transport service types	97
Table 18	Summary of ZRH mode choice models	100
Table 19	ZRH 2012 AI NAI service type summary	102
Table 20	ZRH 2012 AI NAI mode shares	103
Table 21	ZRH 2012 AI NAI public transport demand temporal variation	104
Table 22	ZRH 2012 AI service type summary	106
Table 23	ZRH 2012 AI mode shares	107
Table 24	ZRH 2012 AI public transport demand temporal variation	107
Table 25	ZRH 2030 AI NAI service type summary	110

Table 26	ZRH 2030 AI NAI mode shares.....	110
Table 27	ZRH 2030 AI NAI public transport demand temporal variation	111
Table 28	ZRH 2030 AI service type summary.....	113
Table 29	ZRH 2030 AI mode shares.....	114
Table 30	ZRH 2030 AI public transport demand temporal variation	114
Table 31	ZRH summary of network compositions per scenario.....	115
Table 32	ZRH service type share of passengers at airport.....	116
Table 33	ZRH summary of mode shares per scenario	116
Table 34	ZRH summary of public transport demand variation per scenario	116
Table 35	Estimated service daily utilisation for 2012 and 2030 AI NAI scenarios ...	118
Table 36	Estimated service daily utilisation for 2012 and 2030 NAI only scenarios	118
Table 37	Summary of demand volumes for 2014 and 2027 scenarios	130
Table 38	DUS case public transport service types	133
Table 39	Summary of DUS mode choice models.....	136
Table 40	DUS 2014 AI NAI service type summary.....	139
Table 41	DUS 2014 AI NAI mode shares.....	140
Table 42	DUS2014 AI NAI public transport demand temporal variation	141
Table 43	DUS 2014 AI service type summary.....	143
Table 44	DUS 2014 AI mode shares.....	144
Table 45	DUS2014 AI public transport demand temporal variation	144
Table 46	DUS 2027 AI NAI service type summary.....	146
Table 47	DUS 2027 AI NAI mode shares.....	147
Table 48	DUS 2027 AI NAI public transport demand temporal variation	148
Table 49	DUS 2027 AI service type summary.....	150
Table 50	DUS 2027 AI mode shares.....	151
Table 51	DUS 2027 AI public transport demand temporal variation	151
Table 52	DUS summary of network compositions per scenario	152

Table 53	DUS service type share of passengers at airport	153
Table 54	DUS summary of mode shares per scenario	153
Table 55	DUS summary of public transport demand variation per scenario	154
Table 56	Estimated service daily utilisation for 2014 and 2027 AI NAI scenarios ...	154
Table 57	Estimated service daily utilisation for 2014 and 2027 NAI only scenarios	155
Table 58	Trip number and public transport use summary for ZRH and DUS scenarios	156

List of figures

Figure 1	Structure of the Research	5
Figure 2	Speed, capacity and serviced distance ranges for public transport service types	18
Figure 3	Speeds, capacities and technical characteristics for common public transport technologies.....	30
Figure 4	Overview of Zurich airport situation	40
Figure 5	2015 advertisement for public transport services at Zurich airport.....	43
Figure 6	2012 annual distribution of air passenger volume and public transport use	46
Figure 7	Average daily demand distributions.....	49
Figure 8	Passenger numbers, capacity and utilisation for trains to and from Zurich Airport	51
Figure 9	Interactions of public transport demand, its distribution and service levels	55
Figure 10	Impact of new and different demand on the public transport interaction system	56
Figure 11	Conceptual model of AI and NAI demand superimposition results	57
Figure 12	Traveller group differentiation.....	61
Figure 13	Public transport service and demand circle, simplified	67
Figure 14	Detailed illustration of method and successive steps.....	72

Figure 15	Successive steps for Zurich case study and current situation.....	77
Figure 16	Estimated and measured temporal demand distribution	79
Figure 17	Average daily air passenger distribution for Zurich and Dusseldorf	85
Figure 18	Zurich ground access groups and mode shares, excl. public transport transfers.....	88
