

# S U M M A R Y

---

## Volume 1.

### § 1 : Organization of the S.N.C.B./N.M.B.S.

- 1.1. General
- 1.2. Rolling stock
- 1.3. Staff
- 1.4. Structure of the S.N.C.B.
- 1.5. Supervisory body.
- 1.6. Meeting of shareholders
- 1.7. Management
- 1.8. Relationship between S.N.C.B. and its personnel
- 1.9. Principal statistics compared to SRT.
- 1.10. General statistics of transport in Belgium.

### § 2 : History and Evolution of Signalling in Belgian Railways.

- 2.1. The beginning of railways until 1918
- 2.2. The period between the two world wars
- 2.3. The period from 1945 until today.

### § 3 : Infrastructure of Electric and Signalling Department.

- 3.1. General
- 3.2. Method of maintenance
- 3.3. Typical example of maintenance stipulation period
- 3.4. Determining staff number
- 3.5. Example of calculation.

§ 4 : Supply and workshop of Electric and Signalling Department.

- 4.1. Objectives
- 4.2. Organization
- 4.3. Workshop
  - 4.3.1. Electrical assembly
  - 4.3.2. Fabrication
- 4.4. Store and supply
- 4.5. The staff and operating expenses

§ 5 : Signalling system of the S.N.C.B./N.M.B.S.

- 5.1. Warning signal
- 5.2. Home signal
- 5.3. Starter signal on main line
- 5.4. Starter signal on loop line
- 5.5. Fixed sign board
- 5.6. Shunting signal
- 5.7. Miscellaneous
- 5.8. Approaching signal fixed sign board.

§ 6 : Interlocking system.

- 6.1. General
- 6.2. Indicator panel
- 6.3. Control desk
- 6.4. Push button and route control circuit
- 6.5. Route locking circuit
- 6.6. Route locking control circuit
- 6.7. Point control circuit
- 6.8. Treadle circuit
- 6.9. Route checking circuit
- 6.10. Signal control circuit
- 6.11. Signal aspect control circuit
- 6.12. Automatic barrier control circuit
- 6.13. Alarm system

§ 7 : Automatic block

7.1. General description

7.2. Typical automatic block circuit

§ 8 : Bidirectional block circuit

§ 9 : Level crossing signals and barriers function

9.1. Introduction

9.2. Description of level crossing signals and signs

9.2.1. Full width crossing barriers

9.2.2. Half width crossing barriers

9.2.3. Flashing signals and signs only

9.2.4. Traffic signs only.

Appendix : Electrification of the S.N.C.B./N.M.B.S.

## SUMMARY

Volume 2 (enclosures).

### § 1 : Organization of the S.N.C.B./N.M.B.S.

- . fig.1 Structure of the S.N.C.B./N.M.B.S.
- . fig.2 S.N.C.B. organization chart
- . fig.3 Network
- . fig.4 Passenger traffic
- . fig.5 Freight daily traffic

### § 2 : History and Evolution of Signalling in Belgian Railways.

- . fig.1 Station Liège (Guillemins) in 1920.
- . fig.2 Station Liège (Guillemins) in 1982.

### § 3 : Infrastructure of Electric and Signalling Department.

- . fig.1 Electric and Signalling Department (headquarters)
- . fig.2 Type of signalling (1-1-82)
- . fig.3 Interlocking (1-1-82)
- . fig.4 Type of block system (1-1-82)
- . fig.5 Remote control master plan

### § 4 : Supply and workshop of Electric and Signalling Department.

- . organization chart
- . fig.1 Workshop and store - Staff on 1.3.81
- . fig.2 The number of personal in work (workers)
- . table 1 Wiring analysis
- . table 2 Wiring description
- . table 3 Relay characteristic and contacts analysis
- . table 4 Testing performance of point machine

### § 5 : Signalling system of the S.N.C.B./N.M.B.S.

### § 6 : Interlocking system.

- . push button
- . control panel symbols
- . panel indicators
- . relays
- . auxiliary control key switch
- . signal and aspect symbols
- . drawing n°1 SIGNAL LAYOUT AND TRACK PLAN
- . drawing n°2 PUSH BUTTON CONTROL PANEL

- . drawing n°3 POINT CONTROL PUSH BUTTON AND EMERGENCY SWITCH
- . drawing n°4 INDICATOR PANEL
- . drawing n°5 ROUTE CONTROL CIRCUIT (CR) - K-KX
- . drawing n°6 ROUTE CONTROL CIRCUIT (CR) - C-CX
- . drawing n°7 ROUTE LOCKING CIRCUIT (IR) - K-KX-C-CX
- . drawing n°8 ROUTE LOCKING CONTROL CIRCUIT (CIR) -K-KX-C-CX
- . drawing n°9 POINT CONTROL CIRCUIT
- . drawing n°10 POINT CONTROL AND CHECKING CIRCUIT
- . drawing n°11 TREADLE REGISTER CIRCUIT
- . drawing n°12 ROUTE CHECKING CIRCUIT (KR) -C-CX
- . drawing n°13 ROUTE CHECKING CIRCUIT (KR) -K-KX
- . drawing n°14 SIGNAL CONTROL CIRCUIT -C-CX
- . drawing n°15 SIGNAL CONTROL CIRCUIT -K-KX
- . drawing n°16 SIGNAL ASPECT CONTROL CIRCUIT - C
- . drawing n°17 SIGNAL ASPECT CONTROL CIRCUIT - E
- . drawing n°18 ROUTE REGISTER CIRCUIT (RSDU)
- . drawing n°19 BARRIER CONTROL CIRCUIT
- . drawing n°20 BARRIER CHECKING AND TIME DELAY CONTROL CIRCUIT

§ 7 : Automatic block.

- . fig.1 proposal signal layout for automatic block
- . fig.2 typical automatic block circuit (drawing n°24)

§ 8 : Bidirectional block circuit.

- . See drawing n°21 local station and adjacent station interlocking
- . See drawing n°22 transmission circuits
- . See drawing n°23 local station equipment.

§ 9 : Level crossing signals and barrier function.

Appendix : Electrification of the S.N.C.B./N.M.B.S.

Electrification.
