

# MODULE 2

## ORGANIZATION AND MANAGEMENT OF THE MAINTENANCE AND REPAIR OF DIESEL TRACTIVE STOCK

### CONTENTS

1. Introduction.
  - 1.1. The maintenance function.
  - 1.2. Types of maintenance.
    - 1.2.1. Design-out maintenance.
    - 1.2.2. Preventive maintenance.
    - 1.2.3. Corrective maintenance.
2. Diesel traction fleet.
3. Maintenance policy.
  - 3.1. Principles.
  - 3.2. Scheduled maintenance.
    - 3.2.1. Complete inspection.
    - 3.2.2. Periodic maintenance.
    - 3.2.3. Overhauls.
  - 3.3. Unscheduled work.
  - 3.4. Spectrographic oil analysis process.
    - 3.4.1. Economy of oil consumption.
    - 3.4.2. Monitoring of diesel engine.
  - 3.5. Documentation system.
4. Maintenance centres for diesel traction.
  - 4.1. Geographic organization.
  - 4.2. Principles of the organization.
  - 4.3. Personnel.

5. Management.

5.1. Availability of the rolling stock.

5.1.1. Availability at 08.00 am.

5.1.2. Availability at 16.00 pm.

5.1.3. Spare parts.

5.2. Recording of the kilometer performance.

5.3. Failures in line.

5.4. Recording of the maintenance cost.

5.4.1. Maintenance in traction workshop.

5.4.2. Overhaul and repair in central workshop.

5.5. Management of spare parts supply.

5.6. Modification of the rolling stock.
