

SECOND INTERNATIONAL SYMPOSIUM ON THE USE OF CYBERNETICS ON THE RAILWAYS

Montreal, 1-6 October 1967

Proceedings edited by
THE INTERNATIONAL UNION OF RAILWAYS

14-16, rue Jean Rey, Paris 15e, France

and

CANADIAN NATIONAL RAILWAYS

P.O. Box 8100, Montreal, Canada

CONTENTS

- 8 Arrangements Committee.
- 8 Technical Committee.
- 8 Session Chairmen and Vice-Chairmen.
- 11 Introduction,
by M. ARCHER.
- Opening Session.**
- 13 Address by J.W. PICKERSGILL.
- 17 Reply by E. UPMARK.
- 18 Reply by A.E. PERLMAN.
- 19 Reply by A.P. PETROV.
- Session 1 — General aspects of railroad cybernetics.**
- 21 Present trends in the use of cybernetics on railways, by A.P. PETROV.
- 29 The impact of cybernetics on railroads — present and future, by A.E. PERLMAN.
- 35 Cybernetics and its application to management information, logistic planning and control in Canadian National Railways, by M. ARCHER.
- 41 Industry-wide program in data systems information exchange and standardization, by C.L. BYHAM.
- 47 UIC programme of cybernetic studies, by P. ŘEZÁČ.
- 52 Some economic and organisational aspects of preparations for the use of electronic data processing equipment for the centralised control of freight traffic on the D.R., by G. JÄHNIG.
- 57 Concept of cybernetic applications on the Č.S.D., by K. PIVOŇKA.
- Session 2 — Automatic control of trains movements.**
- 61 The planning, implementation and testing of a totally automated concept for the Bay Area Rapid Transit System, by D.N. ABOUDARA.
- 67 Study on automatic train regulation in Japanese National Railways, by Toshihiko ITO and Kyoji TSUBOUCHI.
- 72 Automatic train control, by C. LAURENT and M. LAPLAICHE.
- 77 « Line autodispatcher » — an optimisation and automation system for train movement control, by B.A. ZAVYALOV.
- 81 « Fluidification » of train running at the approaches to junctions, by E. BRUCKER.
- 87 Southern's approach to computer support of railways operations, by J.L. JONES.
- Session 3 — Management of freight traffic.**
- 93 Integrated data processing of information on freight traffic operations, by J. McL. MARSHALL.
- 98 The use of an information system for car distribution and in the reduction of total distribution costs, by F.H. COYNE and O.J. HERMANN, Jr.

- 105 Centralised management of goods traffic on the French Railways (S.N.C.F.) and the data transmission network set up for this purpose, by A. GUERVILLE and C. LAURENT.
- 109 Concentration of data using electronic telegraphic counters and mechanisation of paperwork in marshalling yards : stages in the progressive introduction of centralised freight traffic control on the S.N.C.B., by M. GOCHET.
- 114 Integrated processing of data relative to goods traffic and preparation of transport schedules by electronic computer, by W.J. DE GRAAF and G.A. POUW.
- 119 The role of automatic car identification in the total management information system, by J.J. SCHMIDT.
- 125 Compilation of data and communications systems, by J.N. ALBERTSON.

Session 4 — Mathematical and simulation methods in rail transport.

- 130 The development of strategic planning techniques, by H. MALLINSON, J. HEATON and N.J.B. ALEXANDER.
- 134 Synthesis and analysis of some transport price policies with a chance-constrained demand capture model, by A. CHARNES, W.M. RAIKE and M.J.L. KIRBY.
- 143 The system of optimisation of transport schedules with the use of mathematical methods and electronic equipment for assessing transport requirements; optimisation of distribution and forwarding; preparation of train formation diagrams, by M. RICHTER.
- 148 Railroad network model, by J.A. BELLMAN.
- 154 Scheduling empty freight car fleets on the Louisville and Nashville railroad, by C.D. LEDDON and E. WRATHALL.
- 158 The use of a computer simulation model for classification yard design, by R.H. NADEL and E.M. ROVNER.
- 162 The possibilities of using electronic data processing equipment for the preparation of working timetables and other operation documents, derived from time-schedules (rolling stock schedules, staff rosters, line traffic densities), by E. BRETTMANN.
- 167 Cybernetic criteria for evaluation of line and station traffic capabilities, by G. POTTHOFF.
- 171 A simulation method applicable to railway operation, by P.J. COATES and P.W. CLARK.
- 176 Computer simulation developments in Canadian National Railways, by P.B. WILSON and D.C. LACH.

Session 5 — Management and automation of operations in marshalling yards.

- 183 Technical principles and methods for the automatic control of shunting and train formation in marshalling yards, by H. DELVENDAHL.
- 188 Automation of Koriyama marshalling yard, by Takuichi INNAMI and Kenkichi MATSUSHIMA.
- 193 Process automation and management control in yards and terminals, by H.N. LADEN.
- 199 Computer assistance for real-time planning of yard operations, by W.P. ALLMAN.
- 204 The use of digital computers in yard switching and terminal operations, by R.C. KARVWATT.
- 209 Automation of switching operations in yards and terminal stations, by J.W. GERMANY.

Panel — Ticket sales and reservation of seats on passenger trains.

- 212 Results of enlarged seat reservation system, by Kenkichi MATSUSHIMA, Mitsue ITO and Shoichi SEKINE.
- 219 Electronic ticket issuing and seat reservation system on the Spanish National Railway Network, by V. SANZ CAJA.

- 223 Automatic passenger ticket data input through the use of an optical character recognition device, by W.A. ZIMMERMAN.
- 228 Reservations and message switching : two real-time jobs in a single computer, by F.J. BUTTERFIELD.

Discussions.

- 235 Session 1.
- 239 Session 2.
- 243 Session 3.
- 246 Session 4.
- 250 Session 5.
- 255 Panel.

Closing Session.

- 257 Report by A.P. PETROV.
- 258 Report by L.W. MENK.
- 259 Report by A. KARSBERG.
- 261 Report by S. JONES.
- 263 Report by J.M. BENTHAM.
- 265 Report by P.B. WILSON.
- 266 Report by G. POTTHOFF.
- 267 Report by Hideo SHIMA.
- 268 Report by D.B. JENKS.
- 269 Report by Kenkichi MATSUSHIMA.
- 270 Report by J.W. DIFFENDERFER.
- 272 Address by G. BOULANGER.
- 273 Symposium Conclusions by L. ARMAND.
