

The way ahead in a new kind of train

DSB

Contents

| | |
|---------------------------------|----|
| General | 2 |
| A new kind of train | 4 |
| The development | |
| The specification | |
| The solution | |
| Awards for industrial design | |
| Substantial savings | |
| The IC3 train | 6 |
| The Great Belt connection | |
| The new train | |
| Easy and fast coupling | |
| An advanced but proven solution | |
| The Class ER train set | 8 |
| The development | |
| Train lay-out | |
| Vestibules | |
| Maintenance | |
| The control system | |
| Integrated information | 10 |
| Increasing passenger awareness | |
| Staff communications | |
| Train log communications | |
| The EDI solution | |
| IC3 goes abroad | 12 |

Computerised trains and computers for safety

DSB

Contents

| | |
|------------------------------------|---|
| General | 2 |
| Safety first | 3 |
| Computers | |
| Safety and entertainment | |
| Advanced electronics | |
| Safe transmission of signals | |
| Checking for derailment | |
| More is yet to come | |
| Design and development of S-trains | 4 |
| New and better comfort | |
| Handicap-friendly S-trains | |
| Noise reduction | |
| Low energy consumption | |
| High technology | |
| Better information | |
| New S-trains already in 1995 | 6 |
| The Fail-Safe System | |
| Safety and the Great Belt Tunnel | |
| Derailment surveillance | |
| The surveillance system | 8 |
| Automatic stop | |
| Disturbance-free system | |
| Universally feasible | |

Connecting people and places

DSB

Contents

| | |
|--|----|
| General | 2 |
| Creating connections DanRail Consult | 4 |
| The ferries: a great tradition Many connections served Not just a ferry Greetings to Hamlet | 6 |
| What is EDI? EDI and DSB general cargo The future Maintenance management systems | 8 |
| Non polluting bridge maintenance The pallet container | 10 |
| Bridge constructions Road bridges Rail bridges The Bridge Design Office | 12 |

The way ahead in electrification

DSB

Contents

| | |
|---|---|
| General | 2 |
| Long experience, new challenge A modern system 40,000 masts to be erected | 3 |
| Peak load The computer system Construction | 4 |
| Part of the Danish landscape The solution Award for the steel structure | 6 |
| Pile Driver for the Seville line Feasibility study in Israel | 8 |

The way ahead caring for the environment

DSB

Contents

| | |
|--------------------------------------|---|
| General | 2 |
| Problems left over | 3 |
| The need for priorities | |
| The central organisation | |
| Decentralised responsibility | |
| Common tools | |
| DSB and the environment | 4 |
| Environment contracts | |
| Environmental reviews and control | |
| Noise pollution | |
| Soil pollution | |
| Emissions from rolling stock | |
| Life cycle analysis of rolling stock | |
| Infrastructure projects | |
| The consultants | |
| Railways and noise | 6 |
| Noise measurements | |
| Noise barriers | |
| Barrier design | |
| Aesthetics | |
| Technology | |
| Procurement | |
| Speedy construction | |
| The green station | 8 |
| Signals at green | |

The way ahead with dedicated staff

DSB

Contents

| | |
|---|---|
| General | 2 |
| Staff | 3 |
| Uniforms | 4 |
| Technology-based training programmes | 6 |
| Training for traffic control | |
| Training in railway geography | |
| Training in trouble-shooting | |
| Kompetance 2000 | 8 |

The way ahead serving the passengers

DSB

Contents

| | |
|----------------------------------|----|
| General | 2 |
| The purpose | 4 |
| Reliability | |
| Information | |
| Cleanliness | |
| Fighting graffiti | |
| Signs of today | |
| Information at a glance | |
| Universal system | |
| Wall signs | |
| Hanging signs | |
| Wing signs | |
| Mast signs | |
| The information concept | 6 |
| Dynamic traffic information | |
| System Design | |
| Why video monitors? | |
| Information for the blind | |
| Keeping trains clean | 8 |
| The modular system for cleaning | |
| Keeping trains running | |
| Higher qualifications | |
| Co-operation with ISS | |
| Technical and financial benefits | |
| Corporate identity | 10 |
| Coming across | |
| Exporting design know-how | 12 |
