

American Railway Signaling

Principles and Practices

CHAPTER III

Principles and Economics of Signaling

Published by the Signal Section, A. A. R.
59 East Van Buren Street, Chicago 5, Ill.

REVISED MAY 1955

CONTENTS

	Page
Preface.....	iii
Principles of Railroad Signaling.....	3
Systems of Signaling in Service.....	4
Method of Forecasting and Proving the Economic Value of Signaling.....	5
General.....	5
Conditions Before.....	6
Typical Conductor's Wheel Report Form.....	7
Typical Conductor's Delay Report Form.....	8
Conditions After.....	9
Known.....	9
Required.....	10
Assumed.....	12
Determination of Change in Magnitude, and Value, of the Elements	
Involved in the Annual Cost.....	12
Payroll.....	13
Change.....	13
Operating (Road) Employees.....	13
Road Pay.....	13
Terminal Delay Pay.....	14
Non-Operating Employees.....	15
Value.....	16
Operating (Road) Employees.....	16
Road Pay.....	16
Terminal Delay Pay.....	17
Non-Operating Employees.....	17
Train Time.....	17
Change.....	17
Train Hour.....	18
Ton Miles per Train Hour.....	18
Train Mile.....	18
Train Speed.....	18
Value (Cost).....	18
Train Hour.....	18
Train Mile.....	23
Motive Power.....	28
Change.....	28
Value.....	28
Train Stops.....	29
Change.....	29
Value (Cost).....	29
Steam Power.....	29
Cost of Fuel Wasted Making Stop.....	30
Cost of Fuel Consumed While Standing.....	30
Cost of Water Wasted.....	30
Graphic Charts—Horsepower Hours Wasted.....	30
Properties of Saturated Steam.....	32
Properties of Superheated Steam.....	33
Derivation of Formulas.....	37
Cost of Coal Wasted Making Stop.....	37
Cost of Coal Consumed While Standing.....	38

CONTENTS

	Page
Method of Forecasting and Proving the Economic Value of Signaling	
Continued	
Train Stops—Continued	
Steam Power—Continued	
Derivation of Formulas—Continued	
Cost of Water Wasted.....	39
Cost of Oil Wasted Making Stop.....	41
Cost of Oil Consumed While Standing.....	42
Work Wasted vs. Speed.....	43
Derivation of Formulas for Work.....	45
Train Resistance.....	45
Curve Resistance.....	45
Grade Resistance.....	48
Change in Speed.....	49
Computation of Speed-Distance Data.....	50
Computation of Work Data.....	52
Computation of Work Wasted Data.....	52
Tractive Force vs. Speed.....	53
Diesel-Electric Power.....	56
Cost of Stopping Trains (Steam Power Example).....	56
Graphic Chart—Cost of Stop vs. Speed.....	62
Graphic Charts—Fuel Oil Wasted in Stopping.....	63-68
Cost of Fuel Wasted Making Stop.....	69
Fuel Consumed While Braking.....	69
Fuel Consumed While Standing.....	69
Fuel Consumed While Accelerating.....	70
Fuel Consumed Running Through.....	70
Distance and Time vs. Speed.....	72
Tractive Force vs. Speed.....	73
Example.....	73
Cost of Brake Shoe Wear in Making Stop.....	79
Cost of Slowing Down.....	79
Cost of Regaining Lost Time After Stop.....	80
Other Costs Involved in Stopping Trains.....	82
Material and Supplies.....	83
Change.....	83
Fuel.....	83
Other.....	83
Value.....	83
Fuel.....	83
Other.....	83
Taxes.....	83
Change.....	83
Corporate.....	83
Property.....	83
Income.....	84
Payroll.....	84

CONTENTS

	Page
Method of Forecasting and Proving the Economic Value of Signaling—	
Continued	
Taxes—Continued	
Value.....	84
Corporate.....	84
Property.....	84
Income.....	84
Payroll.....	84
Maintenance.....	84
Change.....	84
Track.....	84
Signal.....	85
Motive Power.....	85

Value.....	85
Track.....	85
Signal.....	85
Motive Power.....	85
Other.....	86
Energy.....	86
Change.....	86
Value.....	86
Car Time—Car Saving.....	86
Change.....	86
Value.....	86
Depreciation.....	86
Change.....	86
Value.....	87
Per Diem.....	87
Change.....	87
Value.....	87
Accident.....	87
Change.....	87
Annual Cost.....	87
Insurance Value.....	87
Value.....	88
Investment Saved.....	88
Change.....	88
Track.....	88
Motive Power.....	88
Cars.....	88
Other Facilities.....	88
Value.....	88
Track.....	89
Motive Power.....	89
Cars.....	89
Other Facilities.....	89
Planned Expenditures.....	89
Change.....	89
Value.....	89

CONTENTS

	Page
Method of Forecasting and Proving the Economic Value of Signaling— Continued	
Intangibles.....	89
Safety.....	89
On-Time Performance.....	90
Commercial and Competitive Aspects.....	90
Other.....	90
Interest.....	90
Economic Statement.....	91
Examples.....	93-94
Relation Between Operating Rules, Special Instructions, and Signal Systems.....	95
Description of Various Operating Methods	
Time-Table and Train Order System.....	97
Time-Table and Train Order with Manual Block System.....	97
Automatic Block System.....	98
Requisites.....	98
Interlocking.....	100
Requisites.....	101
Centralized Traffic Control.....	102
Requisites.....	103
Car Retarders.....	103
Railroad-Highway Grade Crossing Protection.....	108
Graphic Train Chart.....	109
Portion of Graphic Train Chart Form.....	109
Fifty Per Cent Reproduction of Portion of Actual Graphic Train Chart	110
Track and Roadway	
Speeds of Trains Through Level Turnouts.....	113
Equated Track Values for Labor Distribution.....	115
