

American Railway Signaling Principles and Practices

CHAPTER VI

Direct Current Relays

Published by the Signal Section, A. A. R.
59 East Van Buren Street, Chicago 5, Ill.

REVISED JANUARY 1959

CONTENTS

	Page
General.....	3
Types of direct current relays.....	3
Theory of an electromagnet as applied to the operation of direct current relays.....	3
Neutral relays.....	4
Coils.....	5
Cores.....	6
Armature.....	7
Air gap.....	7
Contacts.....	7
Binding posts.....	8
Relay supports.....	8
Polarized relays.....	8
Retained neutral polarized relays.....	10
Quick drop-away relays.....	12
Slow drop-away relays.....	13
Slow pick-up relays.....	14
Time element relays.....	14
Electromagnetic type.....	14
Motor-operated type.....	17
Thermal type.....	19
Flasher relays.....	21
Overload relays.....	23
Biased relays.....	26
Interlocking relays.....	29
Power transfer relays.....	32
Approach lighting relays.....	33
Light-out relays.....	34
Two-rate charge control relays.....	36
Plug-in type relays.....	38
Relay coil combinations.....	42
Inspections and tests.....	44
Questions on Chapter VI.....	47
