

# **COMPUTERS IN RAILWAY MANAGEMENT**

**EDITORS: T.K.S. Murthy, L.S. Lawrence  
and R.E. Rivier**

**Computational Mechanics Publications  
Springer-Verlag**

## CONTENTS

### SECTION 1 PLANNING AND MANAGEMENT

Computer-aided Planning for Railway Networks, Lines, and Stations <i>R. E. Rivier, P. Tzieropoulos</i>	3
International Research on the Application of Computers to Railways – Current Work of ORE <i>W. R. Smith</i>	17
Requirements of Branch Software for Urban Public Transport Enterprises <i>H. Brändli</i>	25
Decision-Support Systems and the Strategic Management of Train Service Punctuality <i>R. A. F. Seaton, I. G. Black</i>	35
Computer Aided Planning of Railway Networks: The RAILNOPTS Model <i>S. Pinck, R. Fridel</i>	49
A Data Concept for Simulation of Railway Networks <i>P. Giger</i>	67
Computer Aided Signal Box Design at Belgian Railways <i>P. J. Damas, P. Maebe</i>	77
Computer-Integrated Manufacturing: Strategies for Success <i>G. Harvey</i>	89
Computer Simulation of the Basic Parameters for Designing an Underground Railway Line <i>E. Capillas Hedo, J. Vadillo Vallejo</i>	103
Co-ordination of Railway Engineering Work (CREW) Project <i>R. F. Mitchell</i>	115
On-Line Systems for Maintenance and Operations <i>L. J. Ampstead</i>	121
'Driver-Assist' – Microprocessor Technology to Aid in the Scheduling of Trains <i>I. B. Duncan, K. M. Winch and G. A. Bundell</i>	133
Timetables for the Zurich S-Bahn <i>G. Rey</i>	149

## SECTION 2 INFORMATION SYSTEMS

Management Information System for Track Maintenance and Renewal <i>R. E. Rivier, B. Salchli</i>	161
Application of Automated Control System in Czechoslovak Railways (ČSD) <i>J. Mikolaj</i>	179
Some Aspects of Railway Passenger Information Systems <i>Z. Hrudka</i>	193
BINCO, An Information System for Track Maintenance and Renewal <i>C. Esveld</i>	203
Integrating CAD Usage Between Different Railroad Engineering Disciplines <i>M. C. Walbrun</i>	217
