

Computers in Railways III

Vol 2: Technology

Proceedings of the Third International Conference on
Computer Aided Design, Manufacture and Operation in the
Railway and other Advanced Mass Transit Systems
(COMPRAIL 92), held in Washington DC, U.S.A., during
18-20 August 1992

Editors:

T.K.S. Murthy, Wessex Institute of Technology, U.K.

J. Allan, London Underground Ltd, U.K.

R.J. Hill, University of Bath, U.K.

G. Sciutto, Universita Degli Studi di Genova, Italy

S. Sone, The University of Tokyo, Japan

Computational Mechanics Publications
Southampton Boston

CONTENTS

SECTION 1: POWER SUPPLY

- Sub-Station Uncharacteristic Harmonics Study on a D.C.
Supplied Railway using a Computer Based Model 3
R. Kadhim, W.S. Chan, J. Allan, B. Mellitt
- Rectifier Dynamic Models for Short-Circuit Transient
Analysis in DC Metrorail Systems 15
M. Mazzucchelli, P. Pozzobon, G. Sciutto
- Simulation of Voltage Controlled Traction Rectifiers
on a Medium Voltage AC Distribution System 27
G. Digby, D.B. Hewings, R.J. Kadhim
- The Development of Intelligent Power Systems for Railways 39
R. Takagi, S. Sone
- Computer Simulation for Dynamics of Overhead
Catenary-Pantograph System 51
Y. Fujii, K. Manabe

SECTION 2: TRACTION DRIVES AND PERFORMANCE

- Simulation to Investigate on Torque Ripple in Locomotive
Chopper and Rheostatic Drives 63
T. Ghiara, P. Pozzobon, G. Sciutto, R. Zecchi
- Digital Simulation for Optimum Choice of VSI Structure for
Metrorail Induction Motor Drives 79
M. Carpita, M. Fracchia, P. Pozzobon, S.M. Tenconi
- Design of Railway Traction Drives using Circuit
and Block Oriented Simulation 93
R.J. Hill, A.M. Walczyna

SECTION 3: TRAIN OPERATIONS

- Novel Train Stopping Patterns for High-Frequency,
High-Speed Train Scheduling 107
S. Sone
- Computer Dispatching Simulation of High Density,
Mixed Freight and Passenger Train Operations 119
C.D. Van Dyke, L.C. Davis

An Expert System for Analyzing Process Alarms in the Area of Traction Power Supply <i>H. Schaefer, U. Löwen</i>	131
A Software Code Oriented to Traffic Transient Perturbation Analysis in Metrorail Systems <i>P. Cesario, S. Savio, G. Sciutto</i>	141
Development of a Highly-Automated Train-Scheduling System using an Advanced AI Technology for Creating Very-High-Speed, Very-High-Density Train Schedules <i>S. Tsuruta, Y. Kakumoto</i>	155
Development of the Portable Ticket Issuing Machine <i>M. Uzawa, E. Itoh</i>	167
Reducing Rail Freight Costs with Multi Stage Monte Carlo Optimization <i>W. Conley</i>	177
Automatic Train Protection Trackside Equipment Using Failsafe Micro-Computers <i>K. Inouye, T. Takashige, M. Kakishita, O. Kawai</i>	187
Automated Authority Generation <i>W.W. Weinstein, L.W. Silver</i>	199
Hierarchical Rail Traffic Flow Control <i>M.B. Adams, S.E. Kolitz</i>	211
SECTION 4: VEHICLE STRUCTURE AND DYNAMICS	
A New Wheel/Rail Contact Model for Independent Wheels <i>P. Fisette, J.C. Samin</i>	225
Modeling and Simulation of a Maglev Vehicle <i>A. Balestrino, D. Galardini, R. Gorez, A. Landi</i>	239
Prediction of Railway Vehicle Dynamic Behaviour - the Application of the Vampire Software Package <i>G.A. Scott</i>	247
Global Approach in Tank Car Design and Modifications <i>J.P. Gagnon</i>	259
Simulation of Two Bogie Railcar Movement <i>K. Asano</i>	271

SECTION 5: TRACK

- Computer Model for Analysis of Rail Track Structures 285
G.P. Raymond
- Certain Method of Track Stabilization 297
W. Czyczula
- The Expert System of Drawing a Track Layout 307
N. Kasiwa, M. Wada, M. Sasaki, T. Kubota, A. Gomi, K. Ito
- The Design and Management of the Three Dimensional Alignment of Rails and Switches using RAILCAT 317
L. Gründig, J. Bahndorf, P. Singer
- Design of the New TGV Tracks for the Brussels Midi Station, Using Computer Simulation for their Dynamic Behaviour 329
P. Vanhonacker, I. Couchard, H. Detandt
- RECTIF - A Microcomputer Software System for the Optimization of Curve Alignment 337
A.L. Macedo
- Computer Simulation for Nonstationary Random Vibration Analysis of Railtrack Structure 347
L. Wang
- Formal Representation of Track Topologies by Double Vertex Graphs 359
M. Montigel
- DEFEX, A Software Package for Predicting the Number of Defects in a Railroad Track using Expert Opinion and Observed Defect Data 371
S. Campodónico

SECTION 6: ELECTROMAGNETIC COMPATIBILITY AND ENVIRONMENT

- Theoretical and Experimental Comparison of the Principal Methods Available Today for Calculating Interference between Railway Traction Lines and Communication-Signalling Circuits 381
P.R. Di Mario, L. Mangarella
- Finite Element Method Modelling of Overhead Catenary Rail Track Impedance and Admittance 403
R.J. Hill, D.C. Carpenter

Computer Analysis of Touch and Step Voltages for DC Railways <i>J.G. Yu, C.J. Goodman</i>	417
Computer Simulation of the Emissions and Performance of the IC3 Train Set <i>K.F. Hansen, S.C. Sorenson</i>	431
Evaluation of Exposure of Locomotive Drivers to Whole Body Vibration and the Methods of Effective Vibroisolation <i>P. Kisielewski</i>	441
Numerical Simulation of an Impulsive Wave Emitted from an Exit of High-Speed Railway Tunnel <i>K. Matsuo, T. Aoki, H. Kashimura, K. Iwamoto, Y. Noguchi, Y. Tsujimoto</i>	455
Numerical Simulation of Aerodynamic Noise from High Speed Trains <i>H. Kishimoto, N. Tanabe, T. Funaki, S. Akishita</i>	465
Modelling and Simulation used in the Study of Electromagnetic Compatibility Between Electronic Traction Systems and Railway Signalling Systems <i>B.M. Steyn, J.D. van Wyk</i>	477
