

A Practical Evaluation of
RAILROAD
MOTIVE POWER

by

P. W. KIEFER

*Chief Engineer Motive Power and Rolling Stock
New York Central System*

SIMMONS-BOARDMAN PUBLISHING CORPORATION

New York

CONTENTS

FRONTISPIECE

- Top—"Niagara" Steam Locomotive.
Center—Typical Diesel Road Locomotive.
Bottom—Electric Locomotive.

FOREWORD by Joseph B. Ennis

AUTHOR'S FOREWORD

CHAPTER	PAGE
I. INTRODUCTION	I
The Fundamentals of The Problem	2
(1) Availability and Its Dependent Counterpart, Utilization	2
(2) Over-All Costs of Ownership and Usage	3
(3) Capacity for Work	5
(4) Performance Efficiency	5
II. THE RECIPROCATING-TYPE STEAM LOCOMOTIVE	7
Effects of Reciprocating Over-Balance—Slipping Tests	8
Progress in Improving Availability and Economy	9
<i>Table 1</i> , Principal Characteristics of Progressive Designs	10
Description of N.Y.C. Class S-1 "Niagara" 4-8-4 Type	12
<i>Chart A</i> , Power Characteristic Curves	13
Large-Capacity Tenders	16
Four-Cylinder Non-Articulated Type—P.R.R. Class T-1	17
Poppet Valve Gears	18

CHAPTER	PAGE
III. OTHER COAL-FIRED STEAM LOCOMOTIVES	20
Stoker-Fired Steam-Turbine	20
P.R.R. Class S-2 6-8-6 Type	20
C.&O. 4-8-0-4-8-4 Type—Three Locomotives	22
Pulverized Coal Fired Steam-Turbine	23
IV. THE GAS-TURBINE LOCOMOTIVE	24
Coal Fired	24
Oil Fired—A.T.& S.F. 4-8-4 Type	26
Power-Gas Process	26
V. ELECTRIC LOCOMOTIVES	28
Advantages and Disadvantages	28
VI. DIESEL-ELECTRIC LOCOMOTIVES	31
Number in Service on N.Y.C. and On All Railroads	31
Evaluation of Freight Diesels Versus Modern Steam	32
Passenger Diesels on N.Y.C.	33
Recent Designs of Diesels	34
VII. MOTIVE-POWER POTENTIALITIES	37
Availability and Utilization	37
Passenger Service	37
Comparative Annual Potential Performance—Diesel Versus Steam	38
Check of On-Time Record—Diesel Versus Steam	40
Electric Locomotives—New York—Harmon	41
Difficulties Peculiar to Steam Locomotives	41
Diesel Troubles	43
Electric Locomotives	44
Freight Service	44

CONTENTS

CHAPTER	PAGE
Comparative Annual Potential Performance	
—Diesel Versus Steam	45
New Designs and Kinds of Locomotives	46
Over-All Costs of Ownership and Usage	46
First Costs	46
Annual Operating Costs	47
<i>Table 2, Annual Costs</i>	48
Capacity for Work	49
Description of Test Methods	49
Valve Pilot Operation	50
<i>Chart B, Power Characteristic Curves, Reciprocating Steam and Diesel-Electric Freight</i>	52
<i>Chart C, Power Characteristic Curves, Reciprocating Steam, Electric and Diesel Electric Passenger</i>	53
<i>Chart D, Acceleration Characteristic Curves, Reciprocating Steam, Electric and Diesel-Electric Passenger</i>	54
<i>Table 3, Acceleration, Steam, Electric and Diesel-Electric</i>	55
5000 H.P. Continuous Rating Electric Locomotive	55
<i>facing p.</i>	
Comparative Advantages of Electric and Diesel-Electric Versus Steam	56
Performance Efficiency	59
Thermal at Drawbar Referred to Fuel	59
Over-All	60
VIII. CONCLUSION	62
Summary of Motive-Power Evaluations	63
<i>Table 4, Relative Evaluations</i>	64
