	<i>A Little Economic History—Headquarters—Plans for the Future.</i>	
Appendix	CHRONOLOGY OF PRINCIPAL EVENTS ON LONDON'S UNDERGROUND RAILWAYS - - -	140

ACKNOWLEDGEMENTS

The author realised that in attempting to write comprehensibly about London's Underground Railways, he would need to consult many records and to visit most of the places mentioned in this book. He is particularly indebted to those officials of the London Transport Executive who facilitated these tasks, and hopes that any one of them reading this will accept the author's sincere thanks as they are written here. With equal sincerity he thanks each and everyone not directly connected with the Executive who so kindly helped by supplying information.
