

TRANSPORT RESEARCH

COST 318

Interactions between
High-Speed Rail and
Air Passenger Transport

Final Report of the Action

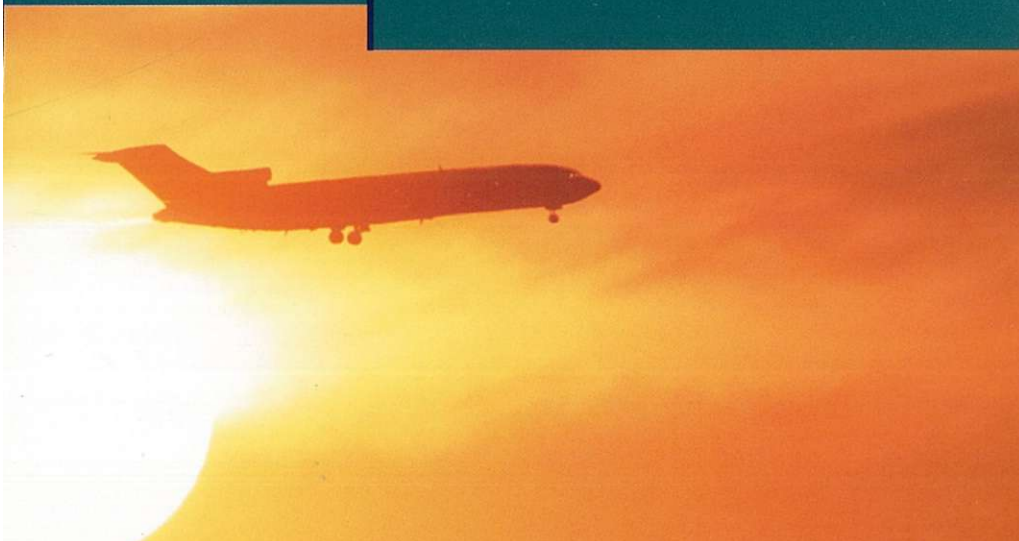

Table of Contents

	Page
List of Figures	VIII
List of Tables	IX
List of Annexes	X
List of Abbreviations	XI
1 Introduction.....	1
1.1 Recommendations of the Subcommittee.....	1
1.2 Short historical Description Development of Rail and Air Transport	3
1.2.1 Railways after the Second World War.....	3
1.2.2 Developments in Aviation	5
1.3 Tendencies in the World around High-Speed Rail and Air Transport.....	7
1.3.1 Global economic trends	7
1.3.2 Tendencies in Air and Rail Traffic	10
1.4 The Idea of High-Speed Rail in Europe.....	12
1.5 Perspectives for an Analysis	13
1.6 Air Transport as a Forerunner and a Model for High-Speed Rail.....	15
1.6.1 European Transport System.....	15
1.6.2 European High-Speed Rail Transport.....	19
1.6.3 Air Transport in Europe	26
1.6.4 Comparison of the Development of High-Speed Rail and Air Transport.....	32
1.6.5 Is Air Transport a Forerunner for High-Speed Rail Transport?...	42
1.6.6 Conclusion	44
1.7 Are there Limitations of High-Speed Rail in the Future?	45
1.7.1 „High-Speed Rail“	45
1.7.2 „Best Time“.....	46
1.7.3 Concept of Limitation	47
1.7.4 Conclusion	49
2 New High-Speed System and Optimisation of the Adjustment between Supply and Demand.....	51
2.1 The Ability of High-Speed Rail to compete with Air Passenger Transport	51
2.2 How to improve the Co-ordination of Rail and Air Transport System Capacities due to High-Speed Rail Transport?	52
2.2.1 Findings from existing studies	52
2.2.2 New steps forward	53

2.3	Are there Improvements in the Distribution of Air Transport Demand among Airports?	56
2.3.1	Distribution in general	56
2.3.2	Past and present Distribution of Air Passenger Transport Demand.....	59
2.3.3	Trends and Prospects	65
2.3.4	Case Studies	66
2.3.5	Conclusions	69
2.4	Which Scenarios of Complementarity between Air and High-Speed Rail Passenger Transport ?.....	71

3 New High-Speed System and Increase in the socio-economic Profitability75

3.1	The Need of Extended Services on Train.....	75
3.1.1	Introduction.....	75
3.1.2	Price and Ticketing System.....	77
3.1.3	Travel Time, Frequency and Scheduling	77
3.1.4	Comfort, Service, etc	80
3.1.5	Safety and Concern for the Environment.....	83
3.1.6	Conclusions.....	84
3.2	Is Air Passenger Transport more flexible than High-Speed Rail?	84
3.2.1	Flexibility of Air Passenger Transport.....	84
3.2.2	Conclusions.....	87
3.3	Does Air Transport allow the Saving of important Investment Costs?	88
3.3.1	Costs of High-Speed Rail Transport	88
3.3.2	Costs of Air Transport.....	91
3.3.3	Comparison of Costs.....	94
3.3.4	Conclusions.....	99
3.4	What are multidimensional Effects of High-Speed Rail?	100
3.4.1	The Effects on Time Saving.....	100
3.4.2	The Effects on Operating Costs	101
3.4.3	The Effects on Energy Consumption	101
3.4.4	The Effects on Air Pollution	102
3.4.5	The Effects on Noise Disturbance	103
3.4.6	The Effects on Airport Infrastructure Investments	103
3.4.7	Conclusions.....	104

4	Effects of Rail Stations at Airports	105
4.1	General Effects of Rail Stations at Airports.....	105
4.1.1	Beneficial Effects on the Rail Transport System	108
4.1.2	Beneficial Effects on the Air Transport System	110
4.2	Multidimensional Effects of Rail Stations at Airports	112
4.3	The Distribution of Air Passenger Transport Demand due to Rail Stations at Airports	116
4.3.1	Compatibility as „Complementary“ and/or,„by Substitution“ ...	117
4.3.2	Rail Stations at Airports	119
4.3.3	Evaluation of Outside Reports	122
4.3.4	Case Studies	124
4.3.5	Short Missions.....	127
4.3.6	Delphi-Survey	134
4.3.7	Comparisons (according to typical Backgrounds)	137
4.3.8	Conclusions	141
4.4	The Impact of Rail Stations at Airports on the Public Transport Balance of Accounts	144
4.4.1	Practical Dealing Process of Hypothesis 13	145
4.4.2	Case Studies	147
5	Comprehensive Description of Results	157
5.1	Adjustment between Supply and Demand	157
5.2	Level of Services	158
5.3	Socio-economic Profitability	160
5.4	Rail Stations at Airports	161
5.5	Balance of the Transport System	164
6	Formulation of the Final Theses and Hypotheses	165
6.1	Conclusion for each Hypothesis.....	165
6.2	Final Formulation of all Theses and Hypotheses	168
	Bibliography	171
	List of Members of COST 318	173
	Annexes	177
	Memorandum of Understanding	309
	COST Transport Overview	323

List of Figures

	Page
Fig. 1	The TEE-Network during the last Schedule Period 1986/87 4
Fig. 2	European Airports with more than 5 million Passengers 6
Fig. 3	Total Travel Time between the City Centres of Stockholm and Gothenburg with different Modes 11
Fig. 4	Perspective Analysis 14
Fig. 5	European Air Traffic Network 1995 17
Fig. 6	European High-Speed Rail Network 2010 18
Fig. 7	Development of Air Transport Demand on Different City Pairs (1. set) 31
Fig. 8	Development of Air Transport Demand on Different City Pairs (2. set) 31
Fig. 9	Development of Railway Passenger Demand on French South-East Corridor 32
Fig. 10	Development of Domestic Air Transport in France 33
Fig. 11	Development of Air Passenger Demand from London 33
Fig. 12	Original Mode of Transport of AVE Travellers on Madrid-Sevilla Corridor 34
Fig. 13	Reasons for Remaining with Air Transport for Travellers on Madrid-Sevilla Corridor 34
Fig. 14	Modal Split Aircraft – AVE 35
Fig. 15	Air Passenger Demand 1993 on Madrid-Sevilla Corridor 35
Fig. 16	Air Passenger Demand on rival Links with AVE 36
Fig. 17	O-D Demand Hanover – Frankfurt 37
Fig. 18	O-D Demand Stuttgart – Frankfurt 37
Fig. 19	O-D Demand Munich – Frankfurt 38
Fig. 20	O-D Demand Hamburg – Frankfurt 39
Fig. 21	Change in Air Travel Demand after Introducing HSR 40
Fig. 22	Frequencies Stockholm – Gothenburg 40
Fig. 23	Demand Stockholm – Gothenburg 41
Fig. 24	Influence of TGV on Modal Split 42
Fig. 25	Development Curve 47
Fig. 26	Numbers of People indicating various Factors for the Modal Choice 76
Fig. 27	Distance Intervals according to the Mode of Transport 79
Fig. 28	Most important Reasons for Spanish HSR Passenger Modal Choice 81
Fig. 29	Development of Departure Airports from Germany to East-Europe 86
Fig. 30	Development of Links from Germany to East-Europe 86
Fig. 31	Development of Frequencies from Germany to East-Europe 86
Fig. 32	CDG Catchment Area by TGV 111
Fig. 33	General influence of Speed on Modal Split for Road, Air and Railway 164

List of Tables

		Page
Tab. 1	Length of the European High-Speed Rail 1994	19
Tab. 2	Survey of the High-Speed Trains in Europe.....	20
Tab. 3	Performance in the European High-Speed Rail 1993.....	20
Tab. 4	Development of the European High-Speed Network	23
Tab. 5	Development of the European High-Speed Network	24
Tab. 6	Development of Passenger Growth at German Airports from 1950-1995	29
Tab. 7	Development of Frequencies on German Airports from 1950-1995.....	30
Tab. 8	Modal Split to Hypothesis 4 (no Rail Stations at Airports).....	67
Tab. 9	Distribution of Mode of Transport on Paris-Lyon-Corridor	78
Tab. 10	European Projects for Infrastructure	90
Tab. 11	Costs for the High-Speed Rail Net till 2010.....	90
Tab. 12	Costs for the Key Links of HSR Network.....	90
Tab. 13	Investment Costs for Air Transport.....	93
Tab. 14	Comparison of Prices and Travel time for the three Modes Car, Train and Air for German Relations.....	96
Tab. 15	Comparison of Prices and Travel time for the three Modes Car, Train and Air for German Relations (Continued).....	97
Tab. 16	Comparison between ICE and Aircraft	98
Tab. 17	Comparison of Costs between ICE and Air	98
Tab. 18	Comparison of Travel Time between ICE and Air.....	99
Tab. 19	External Costs of Transport.....	99
Tab. 20	Typology of Rail Access at Airports	107
Tab. 21	Modal Split to Hypothesis 12 (Rail Station at Rome Airport only and at all Airports).....	126
Tab. 22	ZRH (Zurich) Rail Access Capital Value.....	148
Tab. 23	GVA (Geneva) Rail Access Capital Value.....	148
Tab. 24	FRA (Frankfurt) Rail Access Capital Value	149
Tab. 25	STR (Stuttgart) Rail Access Capital Value, full Infrastructure Costs incorporated	150
Tab. 26	STR Rail Access Capital Value, Infrastructure Costs partly incorporated.....	151
Tab. 27	BRU Rail Access Capital Value.....	151
Tab. 28	CDG2 Rail Access Capital Value.....	153
Tab. 29	ORY Rail Access Capital Value.....	154

List of Annexes

	Page
Annex 1	Bibliography (preparatory subcommittee report)..... 179
Annex 2	Theses and Hypotheses..... 181
Annex 3	Population Distribution and Major Transport Routes 182
Annex 4	European Air Traffic Links from Germany 1994..... 183
Annex 5	European Motorway and Highway System..... 184
Annex 6	The TGV Sud-Est and TGV Atlantique 1991 185
Annex 7	The ICE in Germany in Service 2005 186
Annex 8	The High-Speed Rail Network in Italy..... 187
Annex 9	The High-Speed Rail Network in Spain (AVE)..... 188
Annex 10	Core of the European High-Speed Rail Network 189
Annex 11	European Air Traffic Network 1925 190
Annex 12	Lufthansa Timetable Winter 1956..... 191
Annex 13	Development of Air Traffic Demand on Different City Pairs..... 192
Annex 14	Studies about Interactions between Air and High-Speed Rail 193
Annex 15	Internal Seminar 27 June 1997 in Brussels about models 202
Annex 16	Max. Commercial Speed Selection on Rail..... 239
Annex 17	Typology of actual Air Passenger Transport Demand Distribution among Airports 240
Annex 18	AVE + Talgo Traffic Volumes on Madrid-Cordoba-Sevilla 243
Annex 19	„Direttissima“ and further Case Studies..... 244
Annex 20	Hypothesis 4 vs. Hypothesis 12..... 247
Annex 21	Answers to the Questionnaire on Hypothesis 12..... 248
Annex 22	Air Traffic from West- to East-Germany 1989 249
Annex 23	Air Traffic from West- to East-Germany 1991 250
Annex 24	Air Traffic from West- to East-Germany 1995 251
Annex 25	Air Transport West-Germany - East Europe 1987 252
Annex 26	Air Transport West-Germany - East-Europe 1989..... 253
Annex 27	Air Transport Germany - East-Europe 1991 254
Annex 28	Air Transport Germany - East-Europe 1995 255
Annex 29	Costs for High-Speed Infrastructure..... 256
Annex 30	Rail Links to Airports: Illustration of the Extremes 258
Annex 31	Saving Effects of High-Speed Rail & Air Transport related to each other 259
Annex 32	Airports with more than 2 million Passengers in 1992 with existing or planned Rail Links 266
Annex 33	Short Mission Reports 268
Annex 34	Rail Links at Airports (rough drafts)..... 279
Annex 35	„Delphi“-Survey Questionnaire..... 302
Annex 36	Flowchart of Cost-Benefit-Analysis..... 306
