

COSTS – A TOOL FOR RAILROAD MANAGEMENT

By **ERNEST C. POOLE**, CONSULTING TRANSPORTATION ENGINEER
FORMERLY MANAGER (NOW RETIRED), BUREAU OF
TRANSPORTATION RESEARCH, SOUTHERN PACIFIC COMPANY

One of the nation's leaders in railroad cost analysis here sets forth the basic knowledge every alert railroader needs — to understand and put to practical use this timely technique — indispensable for effective rate-making and economical operation.

Chapter

I.	<p>THE NEED FOR COST INFORMATION IN EFFECTIVE RATE MAKING</p> <p>Under Monopoly (1). Under Competition (2). Reluctance to Accept Cost Calculations (4). Competitors Costs (5). Pricing Practices of Railroad Competitors (5). Future Competition (6). Cost Practices in Other Highly Competitive Business (7). Must Know Customers' Cost (8). Costs in Passenger Service (8).</p>	1
II.	<p>WHAT KIND OF A COST STUDY?</p> <p>Selected Expenses (14). Eight Point Formula (Day Formula) (15). Directly Assigned and Unit Cost Method (Poole Formula) (15). Form A Cost Section (Edward's Formula) (15). Form A Adjusted (Edward's adjustment of Form A) (16). Statistical Method (16). Out-of-Pocket Costs (16). Fully Distributed Costs (18).</p>	13
III.	<p>THE DEVELOPMENT OF FREIGHT SERVICE OUT-OF-POCKET COSTS BY THE DIRECTLY ASSIGNED AND UNIT COST METHOD</p> <p>Maintenance of Way and Structure Expenses (20). Maintenance of Equipment Expenses (27). Depreciation and Interest Expense -- Locomotives (33). Cost of Freight Car Repairs (34). Transportation Expense (36).</p>	20
IV.	<p>THE DEVELOPMENT OF PASSENGER SERVICE OUT-OF-POCKET COSTS BY THE DIRECTLY ASSIGNED AND UNIT COST METHOD (POOLE FORMULA).</p>	45
V.	<p>COMPARISON OF COST APPLICATIONS</p>	57
IV.	<p>COMPARISON OF TRANSPORTATION COSTS</p> <p>Rail Transportation (75). Truck Transportation (80). Piggyback Transportation (83). Transportation by Pipe Line (84). Stand-by Costs (87). Transportation by Water (87). Air Freight (88).</p>	74
VII.	<p>THE CLASS RATE SYSTEM OF PRICING TRANSPORTATION -- ITS OBSCOLESCENCE IN A COMPETITIVE ECONOMY</p> <p>Carload Freight (89). Less Than Carload Freight (105).</p>	89
VIII.	<p>SPECIAL APPLICATIONS OF COST FINDING</p> <p>Way Train Costs (109). Cost of Haul by Directions (115). Cost of Moving Additional Tonnage in Trains (118). Cost of Moving Additional Tonnage in a Car (119). Cost of Reducing Train Time by Faster Running (120). Diverting Traffic to Another Line (123). Diverting Traffic to the More Economical Route (124). Abandonment of One of Two Alternate Routes (125).</p>	10

COSTS - A TOOL FOR RAILROAD MANAGEMENT

V. COMPARISON OF COST APPLICATIONS

V.1	Cost of Hauling 30 Tons from Pacific Coast to a Point in Eastern Territory in a Box Car Using Several Methods of Computing the Cost and the Cost of Hauling the Same Tonnage by Truck	70
V.2	Cost of Hauling 14.0 Tons of Perishables in a Refrigerator Car from Pacific Coast to a Point in Eastern Territory Using Several Methods of Computing the Cost and the Cost of Hauling the Same Tonnage by Truck	71

VI. COMPARISON OF TRANSPORTATION COSTS

VI.1	Cost of Hauling 20, 40 and 60 Net Tons in a Box Car Compared with Cost of Hauling 20 Tons by Truck and 20 Tons by Piggyback -- 1/3 Empty Return	78
VI.2	Cost of Hauling 20, 40 and 60 Net Tons in a Box Car Compared with Hauling 20 Tons by Truck and 20 Tons by Piggyback --100% Empty Return	79
VI.3	Cost of Hauling 20, 40 and 60 Net Tons in a Tank or Hopper Car Compared with Cost of Hauling 20 Tons by a Tank Truck or Dump Truck-- 100% Empty Return	79
VI.4	Out-of-Pocket Cost of Hauling Gasoline in Carloads of 10,000 Gallons Compared with Truck Cost	82
VI.5	Proposed Rates Compared with Out-of-pocket Cost of Hauling Gasoline in Carload Lots of 10,000 Gallons and Haul by Truck	82
VI.6	Average Cost per Carload of Handling Gasoline in Through Freight Trains -- Eight Point Formula -- I. C. C. Cost Section Statement No. 2-52 -- and Diesel Powered Trains	85
VI.7	Estimated Cost of Moving Gasoline from El Paso to Two Points in Arizona by Pipe Line	85

VII. THE CLASS RATE SYSTEM OF PRICING TRANSPORTATION

VII.1	Rate and Out-of-pocket Cost for a Carload of 40,000 Pounds, Class 100 Rate	90
VII.2	Rate and Out-of-pocket Cost for a Carload of 40,000 Pounds, Class 50 Rate	91
VII.3	Rate and Out-of-pocket Cost for a Carload of 40,000 Pounds, Class 20 Rate	92
VII.4	Rate and Out-of-pocket Cost for a Carload of 80,000 Pounds, Class 13 Rate	93
VII.5	Out-of-pocket Cost per Carload for Haul in Box Cars with Various Tonnages per Car	95

CHARTS

xiii

VII.6	Out-of-pocket Cost per Cwt. for Haul in Box Cars from Zero Miles up to 3,000 Miles Loaded with Commodities of Different Densities	96
VII.7	Out-of-pocket Cost in Cents per Cwt. for Haul in Trucks from Zero Miles up to 3,000 Miles Loaded with Commodities of Different Densities	97
VII.8	Out-of-pocket Cost in Cents per Cwt. for Haul in Box Cars and Trucks Loaded with Commodities of Different Densities for a Distance of 3,000 Miles	98
VII.9	Out-of-pocket Cost in Cents per Cwt. for Haul in Box Cars and Trucks with 20 Tons per Truck and from 20 Tons to 70 Tons per Box Car	100
VII.10	Revenue of Suggested Maximum Railroad Rate in Cents per Cwt. for Loads of 20 Tons to 70 Tons per Car Compared with Cost of Haul in Truck Load Lots of 20 Tons.	104

IX. RATE DIVISIONS

IX.1	Figure Illustrating Rate Zones	127
------	--------------------------------	-----

APPENDIX A - PROFILE DATA AS A MEASURE OF LOCOMOTIVE FUEL CONSUMPTION

A	Relationship of Average Grade per Mile to Fuel Consumption	142
---	--	-----

APPENDIX B - TRAFFIC CAPACITY OF RAILROADS

B.1	Theoretical Capacity and Time per Train as Affected by Siding Spacing with Superior Direction Rule	149
B.2	Theoretical Capacity and Time per Train as Affected by Siding Spacing with no Superior Direction Rule	149
B.3	Minutes per Car and Cars per Cut -- Hump Yard with Riders	157
B.4	Minutes per Cut and Cars per Cut -- Hump Yard with Riders	157
B.5	Minutes per Car and Cars per Cut -- Flat Switching Yard	159
B.6	Minutes per Cut and Cars per Cut -- Flat Switching Yard	160
