

STEEL RAILS

THEIR HISTORY, PROPERTIES, STRENGTH
AND MANUFACTURE

WITH NOTES ON THE
PRINCIPLES OF ROLLING STOCK AND TRACK DESIGN

BY

WILLIAM H. SELLEW

PRINCIPAL ASSISTANT ENGINEER, MICHIGAN CENTRAL RAILROAD

361 ILLUSTRATIONS—33 FOLDING PLATES

NEW YORK

D. VAN NOSTRAND COMPANY

1913

CONTENTS

CHAPTER I.—DEVELOPMENT OF THE PRESENT SECTION

	PAGE
1. Early sections	1
2. Present sections.....	14

CHAPTER II.—PRESSURE OF THE WHEEL ON THE RAIL

3. Speeds of modern locomotives.....	21
4. Weights of modern locomotives.....	29
5. Effect of excess balance and angularity of main rod.....	35
6. Effect of irregularities in the track.....	45
7. Effect of rocking of the engine.....	49
8. Effect of flat spots in the wheels.....	54
9. Impact tests.....	62
10. The dynamic augment of the wheel load.....	69
11. Electric locomotives.....	74
12. Cars.....	81

CHAPTER III.—SUPPORTS OF THE RAIL

13. The tie	90
14. Bearing of the rail on the tie.....	122
15. Fastening of the rail to the tie.....	138
16. Strength of the tie	153
17. Bearing on the ballast	179
18. Bearing on the subgrade	180
19. Supporting power of the tie.....	188

CHAPTER IV.—STRESSES IN THE RAIL

20. Stress at point of contact of the wheel with the rail	193
21. Proposed solutions of the bending stress in the rail.....	210
22. Tests to determine the bending stress in the rail.....	218
23. Calculation of the bending and shearing stress in the rail.....	239
24. Effect of the joint.....	259

CHAPTER V.—STRENGTH OF THE RAIL

25. Influence of stress and strain on the strength of the rail.....	270
26. Effect of low temperatures on the strength of the rail	284
27. Physical tests of the strength of the rail	288
28. The strength of the rail and proper weight for various conditions of loading .	310

CHAPTER VI.—INFLUENCE OF DETAIL OF MANUFACTURE		PAGE
29. Chemical composition		326
30. Extraction of the iron from its ore.....		344
31. Conversion of the steel		366
32. The Ingot.....		395
33. Influence of mechanical work.....		420
CHAPTER VII.—RAIL SPECIFICATIONS		
34. Comparison of American specifications		463
35. Specifications (New York Central Lines) for basic open-hearth rails.....		478
36. British standard specifications of bull head railway rails.....		484
37. British standard specifications of flat bottom railway rails		488
38. Specifications for street railway rails.....		491
39. Bibliography of rail specifications		494
APPENDIX		
Reports and records.....		501
Index.....		525
