

12th INTERNATIONAL WHEELSET CONGRESS

*Safety and High Efficiency,
Running into the 21st Century*

Proceeding

September 21 - 25 , 1998

Qingdao , China

Sponsored by: China Railway Society

LIST OF PAPERS TO BE PRESENTED

1. "Wheels and Axles of Chinese Railway Locomotive and Car Meeting Challenges of 21st Century"
ZHOU YIMIN, (CHINA).....10
2. "Present Condition and Future Development of Axles and Wheels of Chinese Railways"
TAN DATONG, (CHINA).....14
- 1-a " Progress in the Reduction of Wheel Spalling"
JAN SUN, KEVIN J.SAWLEY,
DANIEL H.STONE,(U.S.A).....18
- 1-b "The Effect of Resilient Wheels on Track Dynamics"
MAKOTO ISHIDA, SHIGERU MIURA, AKIKO KONO,
KIYOSHI SATOH , HIROSHI HATA, (JAPAN).....30
- 1-c "Microalloying of Passenger Train Wheel Steel"
AN TAO, (CHINA).....39
- 2-a "Wear and Friction of Wheel/Rail Materials for High Adhesion Locomotives"
K.HOU ,J.KALOUSEK,(CANADA)
H.S.LAMBA ,R.T.SCOTT, (U.S.A.).....44
- 2-b "Study on Rim Fatigue Crack and Prevention"
XING LIXIAN, ZHANG YINGZHI ,
LIN JIZHONG, (CHINA).....53
- 2-c "Service-like Durability Approval of Wheelsets"
GERHARD FISCHER,
VATROSLAV GRUBISIC,(GERMANY).....59
- 2-d " Thermally Induced Roughness of Tread Braked Railway Wheels"
TORE VERNERSSON, MARTIN PETERSSON, (SWEDEN)
MARTIN HIENSCH, (THE NETHERLANDS).....68
- 3-a "Theoretical and Experimental Study on Dynamic Rolling Contact Mechanics of Wheel/Rail "
XUESONG JIN, BIQIANG XU, ZHIYUN SHEN, (CHINA).....76

3-b	" Controlled Wheel Climb Derailment Tests Using a Force Measuring Wheelset and AAR's Track Loading Vehicle" WILLIAM C.SHUST, RANDY THOMPSON, JOHN ELKINS, (U.S.A.).....	89
3-c	" Martensite and Contact Fatigue Initiated Wheel Defects" E.MAGEL, J.KALOUSEK, (CANADA).....	100
3-d	" Identification of Tribological Systems in the Wheelsets of Rail Vehicles" HENRYK KULIKOWSKI, ADAM TULECKI, (POLAND)....	112
3-e	" Theoretical Analysis on Dynamics and Stability of a Wheelset Modelled as Continuous System" ROMAN BOGACZ, STANISLAW DZULA, (POLAND).....	119
4-a	" Development and Application of Full Scale Wheelset Test Stand" HOU WEIXING, ZHENG WEISHENG, XING HONGLIN, WANG XISHENG, (CHINA).....	128
4-b	" Predicting the Life of Railway Vehicle Axles" N.GRAVIER, J.-J.VIET, A.LELUAN, (FRANCE).....	133
4-c	" The Fretting Fatigue Crack Initiation Behavior at Press-Fitted Axle Assembly with Variable Stress Loading (Effects of Stress Cycle Ratio, Number of Load Levels and Axle Size)" TAIZO MAKINO ,MIYUKI YAMAMOTO, KENJI HIRAKAWA, (JAPAN).....	147
4-d	" The European Standardization on Wheelsets" J.C.TOURRADE, (FRANCE).....	153
5-a	" Modern Equipment and Technologies in the Production of Railway Wheels" MANFRED LINDENBLATT, (GERMANY).....	160
5-b	" Designing Wheel Profiles for Optimum Wear Performance" HUIMIN WU, JOHN ELKINS, (U.S.A.) SIMON NEWTON, (UK).....	172

5-c	" Experimental Validation of Low Noise Wheel Concepts: Application to Freight and High-speed Traffics" P.FODIMAN, G.GABORIT, P.-E.GAUTIER, (FRANCE)....	181
5-d	" High Production Wheelshop Technology for the 21 st Century" HANS J.NAUMANN, (U.S.A.).....	188
6-a	" Designing Wheels for Increasing Heavy Axle Loads" JOAN XIA, KEITH YOUNG, JACK COUGHLIN, GEORGE SHUNNARAH , (U.S.A.).....	199
6-b	" Development by Numeric Simulation of a New Optimised Wheel Design Able to Withstand Holding Braking in Mountain Terrain" JACQUES RAISON, FRANCOIS DEMILLY, (FRANCE)...	205
6-c	" Residual Stress Evaluation in New Rim-Sprayed Wheels" Matusek, P., Mitura, K. , (CZECH REPUBLIC).....	210
6-d	" Axle Wheel Seat Enhancement by Selective (Brush) Plating Technology" (JASON)MING ZHANG, ERIC MAGEL, HOWARD HAWTHORNE, (CANADA).....	237
7-a	" Research and Application of Bearing Seal on Railway Freight Cars in China" MENG XIANGYU, DIAO KEJUN, (CHINA).....	255
7-b	" Recent Improvements in Bearing Technology for Better Maintenance Efficiency of Rolling Stock" SUZUKI, T., KIGAWA, T. (JAPAN).....	268
7-c	" Advanced Roller Bearing Inspection Systems" GERALD B. ANDERSON, JAMES E.CLINÉ, JAMES BILODEAU, RICHARD SMITH, (U.S.A.).....	273
7-d	" Experimental Studies on the Influences of the Overload on the Crack Growth of Railway Axle Steel" SUN SHOUGUANG, MIAO LONGXIU, YUAN ZUYI, PENG XIANG, (CHINA).....	279
7-e	" Research on Wheel Heat Load of Freight Car" MA DAWEI, (CHINA).....	285

7-f	" Fuzzy Recognition System of Fatigue Crack to Ultrasonic Inspection of In-Service Rolling Stock Axle" TU LIANGPEI , XU YANG, WU JIANLE, YANG JIAN, (CHINA).....	292
7-g	" The Performance Characteristics of Journal Rolling Bearings Equipped with Polymer Cages" GOTTFRIED KURE, (AUSTRIA) BAUZHU LIANG, (GERMANY) MAURIZIO MARTINETTI, (ITALY) JOHN SKILLER, (THE NETHERLANDS).....	298
8-a	" Wheel Failures on Heavy Haul Freight Wheels Due to Subsurface Defects" J. J. MARAIS ,(SOUTH AFRICA).....	306
8-b	" Development of Automatic Ultrasonic Testing Equipment for Shinkansen Vehicle Solid Axle" JIRO YOHSO, (JAPAN).....	315
8-c	" Experiences in Applications of Ultrasonic Stress Measurements for Railroad Industry" ADAM BARTOSIEWICZ , ANDRZEJ BROKOWSKI, JULIAN DEPUTAT, KRZYSZTOF MIZERSKI, JACEK SZELAZEK , (POLAND).....	321
9-a	" Heavy Haul Railroad Gauge Interfaces between Russian, Chinese, Korean and Japanese Rail Systems to Facilitate Future Freight Traffic Flows between these Countries" HAL B. H. COOPER, RONALD E. RAFTER,(U.S.A.).....	338
9-b	" Probability of Omitting Magnetic Particle Flaw Detection and Extending Ultrasonic Test Cycle of Shinkansen Vehicle Axles" ISHIZUKA, H., SATO, Y., (JAPAN).....	357
9-c	" Fatigue of Railway Wheel and its Damage" L.H. QIAN. Y.Z. ZHU.,(CHINA).....	363

LIST OF PAPER TO BE PUBLISHED IN PROCEEDINGS

1. " Reliability Calculation of the Fatigue Life of the Shafe of the Double-Deck Passenger Car"
WEI CHANGZHU, (CHINA).....372
2. " Study on Thermal Fatigue Strengthen and Cracking Behavior of Wheel Casting Steel"
QINGFU HE, ZHIKUN SONG, YAN SUN, (CHINA)..... 383
3. " Railway Wheel Rim Fatigue Break-down and Relevant Problem"
BO.J, YUZHOU Z., (CHINA).....387
4. " New Wheel Design for Passenger and Freight Cars"
RADIM ZIMA,RICHARD BONCEK ,
JAROMIR PAVCO, (CZECH REPUBLIC).....394
5. " Weight Lightening Design of High Speed Wheels"
ZHENG WEISHENG, LUI HUIYING,
LUI XINMING, (CHINA).....403
6. " Usefulness at the Use of Microalloyed Steels at the Basis R7T, B4N Grade According to UIG 812-3 Conditions"
Mitura, K., (CZECH REPUBLIC).....407
7. " New Approach to the Fracture Behavior Evaluation of Rim-Sprayed Solid Wheel Rims"
MATUSEK, P., HOLZMANN, M., DLOUHY,I.
VLACH,B., (CZECH REPUBLIC).....424
8. " Development and Application of the 50 Steel Axle"
LIN JIZHONG, LUI SHUHUA , (CHINA).....438
9. " Production of Near-Net Shape Railroad Components by the Closed Die Rolling Method"
MANFRED LINDENBLATT, (GERMANY).....440
10. " Wheel/Rail Dynamic Interactions on Turnouts"
WANMING ZHAI, (CHINA).....447

11. " A Unified Approach for the Modeling of a Railway Vehicle Dynamics and Simulation"
GANG SHEN, (CHINA) IAN PRATT, (UK).....452
12. " A Comeback of Railway Type Wheels in Outlook"
BOHUMIL VOLF , JAN ONDROUCH,
DANIEL PACHER ,(CZECH REPUBLIC).....457
13. " Fields of Application for Sintered Metal Block Brakes in High Performance Tractive Units"
CARL PETER ZANDER, (GERMANY).....467
14. " On the Fatigue Design Method for High Speed Railway Axles"
KENJI HIRAKAWA,KUBOTA MASANOBU, (JAPAN).....477
15. " Optimizing Technology Management, Increasing Reliability of Wheels & Axles"
YANG NANXIANG, YANG YUNSONG, (CHINA).....483
16. " A High Degree of Operational Liability With Suitable Journal Roller Bearing Designs"
PRÖSCHEL(GERMANY).....493
17. "Processes In the Area of Wheel Contactsurfaces In Regard To Typical Damage"
W. MOMBREI;P. OTTLINGER;H. NEUMANN(GERMANY)
.....497
